SHIVALIKA ENGINEERING

ABOUT US

Shivalika Engineering, also known as Pre Engineered Building & Solutions, was founded in 2014 and is based in central India's MPIDC borgaon. We specialise in pre-fabricated buildings, warehouse storage, cold storage, and industrial sheds. We have a reputable staff that uses all of our skills to design and produce pre-fab structures.

Pre-Engineered Buildings (PEBs) are the building components that are manufactured at a factory and assembled on site. Usually, PEBs are steel structures and can be an alternative to conventional structural steel buildings

PEB industrial sheds are one of the most in demand products in the modular construction segment. These sheds are likewise called pre crafted steel sheds and also are functional in nature. They are function in lots of ways – as factory sheds, warehouses, agriculture buildings, fowl sheds and so forth and so forth.

PEBs maintain their appearance throughout the life of the building due to the quality built into the process and the raw materials used. Steel is rust and corrosion resistant. This creates a solid structure and foundation which is virtually maintenance-free for a longer period than conventional buildings.

MISSION AND VISSION

MISSION

We at Shivalika Engineering are dedicated to providing top notch, Comprehensive solution for PEB structure. We Design Perfect PEB Building which satisfy our client application / purpose with optimum cost.

VISION

To meet consumer expectation at the highest level with a providing the right quality-price ratio.
